

Introduction to Computer and Computer Science

Homework Assignment #1

Due: 9/23 0:00 am

In this homework assignment, you will practice the basic concepts of input, branching, conditional, and iterations. As you have learned all the related knowledge during the lectures (if, while, and for).

Problem #1: Comparison

Please write a program that asks users to type in three numbers $\{x, y, z\}$ and print out the largest odd number among them. If none of them are odd, it should print a corresponding message as well.

Problem #2: Iteration

Please write a program that asks users to type in ten numbers $\{x_1, x_2, \dots, x_{10}\}$ and print out the largest odd number among them. If none of them are odd, it should print a corresponding message as well.

Hand in procedure:

As we had mentioned in the lecture, you should list all of your collaborators in your programs. Here is the template:

```
6
7 # =====
8 #
9 # Homework assignment #0
10 # Student: Your name, 你的名字
11 # Student ID: Your student ID, 你的學號
12 # Collaborators: John Doe, Jane Doe, ...
13 #
14 # =====
15 # Your code goes here...
16
17 |
```

Please save your code as a “.py” file, where the file name should follow this format:

108A_hw#?_ID.py

For example,

108A_hw#1_0180506.py

Please be aware. **We are not going to accept any homework file with wrong file name or without signature.** Please double check the content of your file.

Once you have accomplished your works, you can upload your homework to the “New e3” system. There will be a section for uploading your homework.
