

111A Introduction to Computer and Computer Science

Homework Assignment #0

Due: 9/19 00:00:00

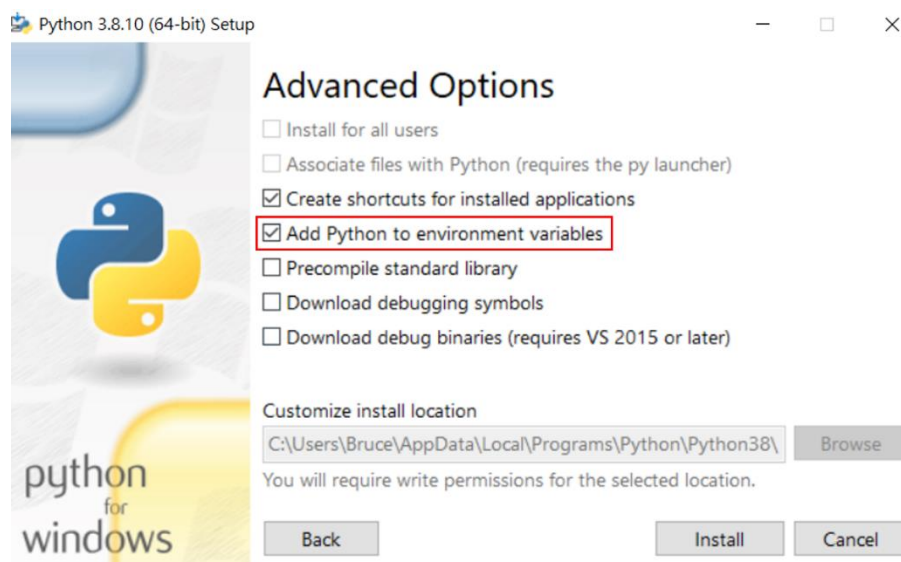

In this homework assignment, you will need to setup the environment of Python for this course. Thanks for the brilliant searching engine, Google. You can easily find all necessary software on the internet. Please follow the instructions:

1. Please download and install Python

- A. Strongly recommend to choose Python 3.8 version, all source code of this course will be written in 3.8.10.

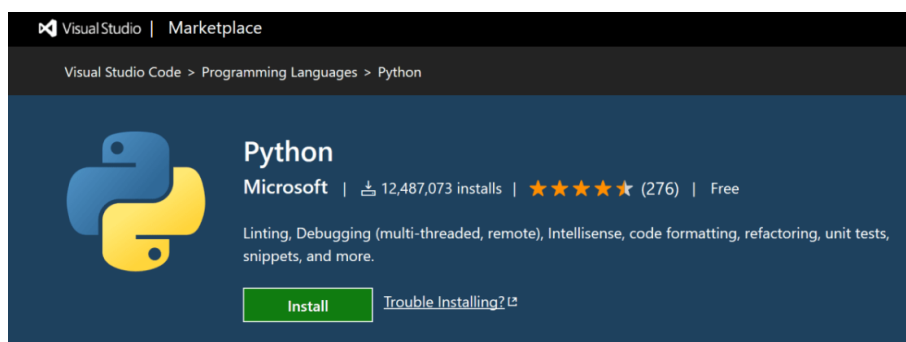

(<https://www.python.org/downloads/release/python-3810/>)

- B. Add Python to the environment variables

2. Please download and install Visual Studio Code

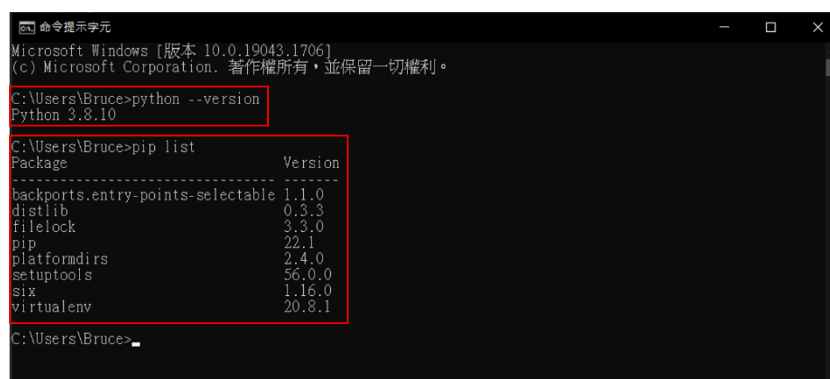

Install the Python extension for VS Code

3. Please open your CMD and printscreen your result

Highlight your result

4. Upload your result with some words

- A. Who are you?
- B. Why are you here?
- C. What do you expect to learn in this course?
- D. What do you want to do in this campus?
- E. Anything you would like to say.

Hand in procedure:

As we had mentioned in the lecture, you should list all of your collaborators in your programs. Here is the template:

```
"""  
Created on Sun Aug 7 01:23:45 2022  
  
@author: Xi Winnie, student ID  
  
@collaborators: Jane Doe, her student ID  
                John Doe, his student ID  
"""
```

Please upload your document as a “.pdf” file, where the file name should follow this format:

111A_hw#0_ID.pdf

For example,

111A_hw#0_0180506.pdf

Please be aware. **We are not going to accept any homework file with wrong file name or without signature.** Please double check the content of your file.

Once you have accomplished your works, you can upload your homework to the “E3@NYCU” system. There will be a section for uploading your homework.
